Manufacturer of equipment for pharmaceutical, chemical and food industries

BREWERIES AND RESTAURANT MICROBREWERIES

The offer of the KATES company includes construction, delivery and assembly of particular elements of technological equipment, up to the construction of whole sections of a brewery, such as a brewing house, a fermentation house, or the construction of a whole plant.

MAIN SECTIONS:

Boiling house – with fully automatic control. The set of basic equipment includes:

- mash tub,
- lauter tub,
- intermediate wort tank,
- wort heater,
- brew kettle,
- settling vat,
- wash station,
- system of water management tanks.

The programme enables application of various technologies in both light beer and dark beer production. The guaranteed capacity is 8 brews per 24 hours.

Fermentation house – fully monitored with a control unit:

- fermentation tanks of required capacity and with a complete set fittings (toplate),
- a system of technological boards,
- fermenter and pipeline cold-wash station.
